

## Internship / thesis (BSc/MSc) for developing a data management plan

We are searching an intern with the possibility for a bachelor or master thesis to develop a data management plan for a research group within the international institute of tropical agriculture (IITA). The target working group is doing research on coffee production and is based in Kampala, Uganda.

IITA is one of the world's leading non-profit research partners in finding solutions for hunger, malnutrition, and poverty. Its award-winning agricultural research for development (R4D) addresses the needs of the poor and vulnerable in the tropics. It works with public and private sector partners to enhance crop quality and productivity, reduce risk to producers and consumers, and generate wealth from agriculture.
